## Historic Preservation Grants by municipality 1992 to 2018

These tables report **all matching grants** from the first NJ Historic Trust grant round in 1992 to the most recent appropriations. The grants provide for the preservation, rehabilitation or interpretation of crucial historic sites owned by the State, municipalities, counties and nonprofit organizations to which the public has access.

The Statewide table shows the number of historic project sites in each town, the number of grants awarded to those sites and the sum value of these grants.

The County by County tables list the number of historic projects in each town and the grants awarded for work at those sites. Many important project sites receive multiple grants over the years.

About half of these funds came through the Garden State Historic Preservation Trust. About half the grants came from the 1989, 1992, 1995, 2007 & 2009 referendum bond funds and from the 2014 Corporation Business Tax dedication.

These tables are limited to projects recommended by the NJ Historic Trust. These tables do not include historic preservation or interpretive projects funded by the NJ Cultural Trust or the NJ Historical Commission.

In the top table "Historic Trust Project Grants 21 Counties," an effort to sum up the projects county by county will yield a total of 509 projects when the statewide summary shows only 506. This was done in order to show projects for Bordentown Township, Lopatcong and Manalapan in order to include all communities that have benefitted from historic preservation grants even though the specific historic site is based in a neighboring town.
